Customer Reviews

Study guide serves as excellent work text and as an excellent review after reading the text. Porth text is very detail specific--not for the faint of heart. Study guide lends clarity. This is advanced knowledge material and the subject matter is complex and indepth.

Book is excellent and seller reliable. Great condition. Explanations complete, in detail with summary at end of each chapter. CD that came with the book was useless, so don't worry about having a book with a cd.

I bought this book for my daughter on the advice of one of her Critical Care Nursing professors and to use as a reference for her upcoming State Board exam. Excellent book! I also bought the text as well. Condition of the book far exceeded my expectations. It was in excellent condition. I was also very pleased with the seller's customer service. The book came much sooner than expected. Thank

you!

in anticipation of taking the class which I wasn't able to do for health reasons but I still have the text book so there is nothing to stop me from learning on my ownâ | when I'm done with my other projects of course! I am a huge advocate of study guides for any text book. There is much in there to help you 'get it' when you take the class. And whenever you need to buy text books, always check first to see if .com has them first as you will always save money!

This book was required for one of my post-graduate classes. I found it to be complete and easy to understand. I am happy with my purchase.

This is a great study guide. It is the only study guide that has truly helped me in a class.

Has lots of differently formatted tests and drills to assess retention. I was a little skeptical as to whether or not I really NEEDED the study guide, but now that I have it I'm very glad I got it. I showed it to another class mate and he is ordering one as well. Price was reasonable for the amount of help it offers and overall page count.

This review book has been very helpful so far, I used it before my exam and it seems to touch on all the important parts of the text book!
